DRIVING CONSTRUCTION FORWARD...

**Surfacing &
Civil Engineering**

Road surfacing is one of our core
business activities.

Surfacing & Civil Engineering Unit

Barr has a century of experience in civil engineering.

**Initially active in its native Ayrshire,
Barr gradually developed a significant
civil engineering portfolio across
the Country.**

Completed projects range from bridges and major trunk roads to concrete repairs and surfacing. The resources of our quarry and plant divisions coupled with the skills of our Surfacing & Civil Engineering team allow Barr to deliver a range of projects in these sectors.

**The Unit's portfolio includes
structural work covering
concrete repairs on roads
and bridges.**
