

# ENERGY POLICY STATEMENT

Barr Limited aims to provide products and services in a responsible manner, helping to ensure a sustainable resource base for our future generations. We are committed to reducing energy use within all aspects of our business by

- Improving our efficient use of all energy sources
- Investing in low carbon and sustainable energy efficient technologies
- Reducing our environmental impact arising from our consumption of energy
- Assisting our clients to improve their energy efficiency

## Target:

**Our target is to reduce our specific energy consumption by 15% over 10 years (by 2018).**

In order to achieve this target, the company will:

- Make more efficient use of all forms of energy
- Establish formal energy reporting against saving targets that are quantifiable and measurable
- Improve the metering, monitoring and targeting system for energy use
- Use alternative fuels and renewable energy sources where cost effective
- Increase awareness of energy efficiency measures amongst all employees
- Ensure that all relevant employees receive training in energy awareness and efficiency improvement techniques
- Conduct site energy audits to identify opportunities for efficiency improvements
- Implement all cost effective energy efficiency measures
- Ensure that energy efficiency and carbon emissions are considered in business development decisions
- Invest in cost effective carbon friendly equipment
- Promote energy efficient proposals for products and services to our clients
- Continuously review developments in products and processes

Copies of this policy are available on the company website and situated on notice boards at all sites

This policy is supported by the Chairman and responsibility for delivery lies with the Divisional Managing Directors.
