

ENVIRONMENTAL POLICY STATEMENT

The senior management of the Barr Manufacturing Division incorporating Solway Structural Steel and Solway Precast Concrete are committed to continually improving our environmental performance and minimising the environmental impact of our activities. In order to achieve this, we will adopt a structured and systematic approach to all of our projects, sites and operations

We will Identify environmental aspects associated with our activities and operations, assess significant impacts and risks and ensure appropriate control measures are implemented, as applicable. Where it is indentified that our activities unavoidably affect the environment, we will aim to minimise adverse impacts.

As part of our commitment to improving environmental performance, we will:

- Set and monitor objectives and targets
- Monitor and review our environmental performance
- Develop, review and maintain a documented management system in order to implement our policies and ensure good practice
- Aim to minimise waste in all our operations as well as reusing materials and recycling, where practicable. We will ensure all waste is disposed of safely and responsibly.
- Prevent pollution
- Monitor, review and comply with all applicable legal and other requirements. In addition, we will endeavour to exceed these requirements, wherever possible.
- Review energy usage and adopt appropriate measures to ensure efficiency and reduced use, wherever possible.
- Ongoing review and assess our activities and processes in order to reduce emissions, where practicable.

The Company recognises the importance of ensuring it carries out its procurement activities with consideration to sustainability principles and environmental considerations. Where practicable, we will work with our suppliers and sub-contractors to minimise any environmental impacts associated with their services or products.

Staff and other appropriate personnel will be made aware of their environmental responsibilities and other relevant environmental issues such as appropriate legal and other requirements. In addition, they will also be advised of any environmental aspects and related impacts associated with their work as required. A series of environmental management guidance notes for Company use will be maintained.

This policy will be communicated to all personnel, sub-contractors and visitors to site who may have an impact on the environmental performance of the site. Copies of this policy are available on the Company website.

Signed

Keith L Hyam
Divisional Managing Director
