

Energy Policy

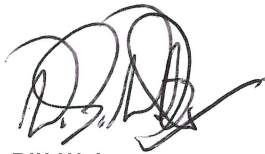

Barr Environmental Limited aims to provide products and services in a responsible manner, helping to ensure a sustainable resource base for our future generations. We are committed to reducing energy use within all aspects of our business by:

- Improving our efficient use of all energy sources
- Investing in low carbon and sustainable energy efficient technologies
- Reducing our environmental impact arising from our consumption of energy
- Assisting our clients to improve their energy efficiency

In order to achieve this each Company division will develop specific action plans to achieve the following objectives:

- Make more efficient use of all forms of energy
- Establish formal energy reporting against saving targets that are quantifiable and measurable
- Improve the metering, monitoring and targeting system for energy use, and ensure availability of sufficient resources and information
- Ensure that all relevant employees receive training in energy awareness and efficiency improvement techniques
- Conduct site energy audits to identify opportunities for efficiency improvements
- Ensure that energy efficiency and carbon emissions are considered in business development decisions
- Promote energy efficient proposals for products and services to our clients
- Continuously review developments in products and processes
- Comply with all legal and other requirements related to our energy use

Copies of this policy are available on the Company's website and situated on notice boards at all sites.
